TANNING

We have tried many different brands of tan and have finally found Moroccan Tan that is suitable for all skin types, and its unique benefits make it the best tan on the market!

- It has 6 different shades to suit all skin types and tan that is desired.
- It is enriched with Argan Oil & Vitamin E which helps to give a flawless, streak-free tan & hydrates the skin rather than making it dry.
- It lasts longer because it hydrates the skin.
- It fades gradually without patching because of the Argan Oil.
- It can be washed off in 2-4 hours & still develops over time.
- This means, no more sleeping in your tan over night, so your clean bed sheets keep clean!

Body Spray Tanning

Upper or lower body ·	£16.50
Full Body Spray Tan ·	£26.95

* Skin test will be required 24-48 hrs before tan.

Before Your Moroccan Tan

- If you have never used tanning products before, you will need to come in and have a patch test done to make sure you are not allergic or have any reactions.
- Do not use any other tanning products 1 week before your tanning treatment.
- Wax or shave at least 24 hours before your treatment.
- On the day of tan exfoliate with a loofah or a dry body brush all over your body to remove any dead skin cells.
- Do not wear any make up, deodorant, moisturisers, perfume, body creams, oils or lotions as they will affect your tan.
- Wear loose, dark clothing to wear home along with flip flops and sandals.
- Tan can stain clothing therefore if you would like to keep your underwear on we suggest that you wear dark/old garments. We do provide disposable knickers if needed.

After Your Moroccan Tan

- Depending on which tan you have will depend on how long you should wait before you shower. The therapist will inform you.
- Avoid coming into contact with any water until you have showered.
- Avoid activities that make you perspire.
- Avoid sun or heat exposure during the development time.
- Once the development time is complete, wash off with warm water & mild body wash.
- Do not rub as this could cause the tan to flake.
- Moisturise everyday to keep skin hydrated and to prolong you tan.
- Avoid swimming as the chlorine can make your tan fade.
